

For Immediate Release

**BCN Telecom, Inc. Announces Acquisition of Telecom Services Customer Base
of AMI Communications Inc.**

Further Expanding Market Presence in the Midwest

Bedminster, New Jersey – July 24, 2014 – BCN Telecom, Inc. and AMI Communications Inc. are pleased to announce the execution of a definitive purchase agreement whereby BCN Telecom shall acquire the telecom services customer base of AMI Communications Inc. The acquisition reflects the continued growth of BCN Telecom and represents a significant expansion of its Mid West market presence. The transaction is subject to completion of regulatory transfers and approvals.

AMI customers will benefit from BCN Telecom's nationwide operating platform which provides Voice, Data, Cloud and Wireless services on a fully integrated basis for business customers. AMI customers will also gain access to BCN's robust operating infrastructure, recently released customer account management portal as well as the entire BCN Telecom products and services offering.

The transaction structure allows for AMI Communications to remain actively involved in servicing and supporting the underlying and long standing customer account relationships of the acquired customer base and shall maintain its office presence in the greater Chicago area. AMI will be a strategic distribution partner of BCN for new telecom customer opportunities. AMI shall continue to operate on a standalone basis its' Managed IT Services business unit which provides management and deployment of IT services, hardware infrastructure, software, security solutions and data storage services at the SMB and Enterprise level.

Julian Jacquez, Executive Vice President of BCN Telecom commented, "We are extremely pleased with the transaction and more importantly, the strategic relationship that we have created with AMI Communications. We look forward to servicing and supporting these customers and will deliver to them an outstanding experience as a BCN Telecom customer." He further added, "The AMI Communications team contains a group of highly experienced telecom professionals and we have already identified ways for them to capitalize upon their role and support their continued success as a trusted telecommunications advisor."

Bob Buchta, President of AMI Communications added, "We found a great strategic partner in BCN Telecom. Collectively, we were able to create a structure that will benefit our customers and allow AMI to continue its growth in telecom services utilizing the BCN Telecom operating platform and service offering. Our new relationship with BCN will enable the AMI team to continue as the primary contact point for AMI customers and we will remain actively involved in developing, servicing and supporting new as well as existing customer relationships."

About BCN Telecom

BCN Telecom is a privately held telecom service provider with corporate headquarters in Bedminster, NJ. For more than 20 years, BCN Telecom has provided competitive telecommunications services with an emphasis on serving business customers. BCN Telecom continues to grow its business through robust organic sales activity from its long-standing network of independent sales partner relationships.

Utilizing its financial strengths and management capabilities, BCN Telecom also continues to expand its business through strategic acquisition activities. BCN Telecom proudly services thousands of customers and partners with hundreds of agents on a nationwide basis. BCN Telecom offers an extensive product and service portfolio which delivers a single-source telecommunications solution for its valued customers.

About AMI Communications

AMI Communications, Inc. is a privately-held telecommunications company headquartered in St. Charles, Illinois with sales offices located in Wisconsin and Indiana. Established in May of 1993, AMI has been providing service and support to business customers located throughout the Chicago/Suburban area as well as nationwide. Having first started out exclusively as a provider of long distance services, AMI has diversified into a full-service telecommunications company offering a complete line of voice, data, IT and enterprise solutions that manage, optimize, secure and transport mission-critical applications. Quality of service and a strong commitment to customer satisfaction have greatly contributed to AMI's continued success over the years
